The Available Light Difference **Adaptability**

Talk about adaptive re-use! From seminar, to game show, to diagnostics center, to cooking classroom Available Light has been there to help our Client deliver a message that is both unique and familiar. Fresh lighting concepts help make an existing property remain vibrant and pro-active—from show to show.

The main lighting elements of the booth are ground supported and integral to the exhibit infrastructure making the occasional enhancement of an overhead lighting system a special treat for strategically important shows or special announcements.
