

Wellesley College - Newhouse Center for the Humanities Renovation Project

Wellesley MA

Available Light joined the architectural team to create a distinctive identity for the Newhouse Center for the Humanities on the main floor of Green Hall, a historic 1928 Collegiate Gothic structure at the heart of the Wellesley campus.

The project design, entailing approximately 6,000-square feet of renovation, included the restoration of existing historic lighting fixtures as well as the sensitive integration of a contemporary luminaires and a lighting control system. The creation of new interior spaces and the careful interweaving of historic and modern elements enhances the experience of both the original architecture.
