

Gettysburg Cyclorama

Gettysburg PA

Following a breath-taking restoration of Phillippoteaux's 1884 massive 42' tall x 377' circumference "Battle of Gettysburg" oil-on-canvas painting, the Cyclorama is now housed in a state of the art facility. A dynamic sound and light show recounts the dramatic conclusion to the historic three day Civil War turning point. Automated special effect luminaires, spotlights, and LED wash lights are all deployed in a 12 minute dramatic presentation. All theatrical lighting treatments were balanced against stringent conservation criteria.

Producer: Donna Lawrence Productions
 Exhibit Design: Gallagher & Associates
 Completed: December 2008
