

Miami Children's Museum

Miami FL

The Miami Children's Museum is a true public/private partnership. From Carnival Cruise Lines to Publix Supermarkets children are encouraged to role play in a number of diverse and enchanting environments. The goal of the lighting design was to be in synch with the exhibit design concept to create heightened naturalistic environments infused with color and theatrical accent. Where possible lighting effects are integrated within the architectural infrastructure. Multiple layers of light (color, texture, accent, etc.) are boldly employed to create a warm & inviting place in which children are allowed to explore, learn, play and have a great time.

Exhibit Design: Lee H. Skolnick Architecture +
Design Partnership

Completed: 2003
