

# AVAILABLE LIGHT

## Top Notch Resort & Condominiums

Stowe VT

The Top Notch Resort required us to create luxury appeal on a modest budget across multiple uses of space: hotel, restaurant/bar, and large multi-function banquet room. Lighting was integrated into the ceiling to minimize their appearance. In the restaurant, a dimming system was used to create the perfect ambiance for each occasion and use. Pre-programming ensures anyone can use the system. In the conference room, banquet color-changing cove lighting was installed to change the lighting from meeting use to event use.

The bird fixtures were Italian and Available Light provided the administrative support to import the fixtures and UL list them.
